

# IRRIFAST

**MORE SAVINGS, PRODUCTIVITY  
AND SPEED FOR YOUR PIVOT**

**YOUR PIVOT WILL  
50% FASTER**

**400 m/h**

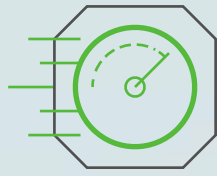

## What is Irrifast?

It is a tower activation system that uses inverters, achieving more precise control of speed and torque, ensuring greater uniformity.

Installed in BAUER pivots, Irrifast works together with our patented alignment system to provide effective irrigation.

# IRRIFAST

**MORE SAVINGS, PRODUCTIVITY  
AND SPEED FOR YOUR PIVOT**

**Faster irrigation  
cycles**

**Smooth and  
constant irrigation**

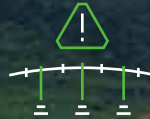

**Uniform and  
efficient fertigation**

**Reduction of  
mechanical maintenance**

**High performance  
on irregular terrain**

**Detection of misaligned  
towers** COMING SOON

**Allows irrigation  
of young plants**

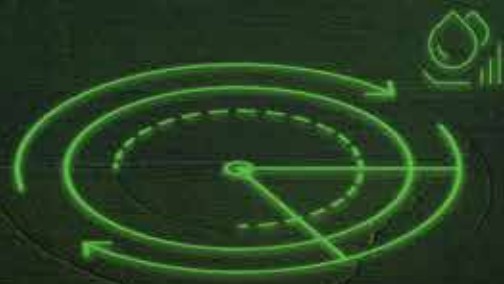

**Up to 40% less power  
consumption thanks  
to continuous drive**

## Technical Data

Product Description	Irrifast Alignment Control Box	Irrifast End Control Box
Version	1.0	1.0
Model	Intermediate Tower	Last Tower
Power Supply	480 VAC	480 VAC
Power Consumption Range	from 6 A	up to 16 A

The Irrifast Control Boxes operate with a voltage of 340 VAC to 510 VAC. Its maximum operating frequency represents an increase of 50% compared to conventional models
